RELEASE OF BID RESULTS
Enable contractors to bid more competitively.

Owner should provide feedback of bid results to enable bidders to evaluate their cost considerations and establish their relative position to the other bidders. Evaluating bids with respect to local market conditions helps Contractors and subcontractors make appropriate adjustments on a timely basis.

- Public sector Owners release bid tabulation as a matter of procedure.
- Private sector Owners are also encouraged to provide appropriate feedback of bid results to the bidders.
- General Contractor should then share the same feedback with their subcontractors who bid on the project.
